SUMMARY

Raised in a family of business owners, learned early that work runs on people and the systems around them. Builds the workflows, automations and dashboards that keep work moving between teams: 5,000+ CRM requests traced to the right owner, a 93% conflict-free schedule across 20+ people and an AI-built tracker that helps supervisors plan ahead. 2+ years across operations and project coordination.

EXPERIENCE

Graduate Affairs Coordinator, Electrical & Computer Engineering · *Western University* Apr 2026 to Present

- Delivered a 93% conflict-free schedule across 20+ staff and faculty by turning a new no-clash rule into an Excel dashboard that flagged conflicts early.
- Cut biweekly admission reporting time by about 30% by building Chair reports, fed by 10+ PeopleSoft queries, that calculate their own totals; audit 100+ applications.
- Cut onboarding time by 30% by writing an SOP that set one operating standard and trained 3 colleagues and 2 work-study students.
- Gave 60+ students across three intakes one clear schedule by building a project milestone guidebook.
- Enabled 5 supervisors to plan work for 2 students ahead of time and see hiring needs by building a tracker with Claude and ChatGPT that flags overdue tasks.
- Earned the trust to expand AI use after initial hesitation by scoping one narrow, low-risk Zoom AI pilot.

Business Analyst Intern · *Solstice HQ* Oct 2026 to Present

- Got about 12 prospects a week to discovery calls with background, goals and blockers captured by mapping intake across LinkedIn, Instagram and other channels and redesigning the questionnaire and handoff.
- Adding a business analysis layer to Career Buddy, my own AI-enabled career app, by defining scope, acceptance criteria, success metrics, three user paths and guardrails for its AI agent.

Academic Department Assistant, Dean's Office · *King's University College* Jun 2025 to Dec 2025

- Cut course-approval turnaround by 15% across 5 departments by reviewing outlines on arrival and sending one email with all notes.

Customer Relations Representative, Service London · *City of London* Dec 2024 to Jun 2025

- Resolved 5,000+ resident requests, rarely with a callback on my own cases, by tracing each request's history, owner and status in Dynamics 365 CRM across 40+ calls a day.

Additional: Creative Director, Gumzo Canada (2024 to Present): built the brand to 100,000+ views and sold-out events · Consultant, AFMUA (2026 to Present): launch video drove 100+ paid registrations.

KEY PROJECT

Career Buddy, independent AI-enabled career empowerment app In progress

Goal: a clear first step for people who do not know where to start. **Action:** architecture first, one narrow job and guardrails for the AI agent, built with Lovable and Claude Code. **Result:** prototype tested against first acceptance criteria.

SKILLS AND TOOLS

Business analysis: requirements gathering · process analysis (as-is and to-be) · stakeholder management · business rules and edge cases · documentation and training · change adoption · reporting

Tools: Excel · Dynamics 365 CRM · PeopleSoft · Kuali · SharePoint · Microsoft 365 · Google Workspace · Qualtrics · Python (basic) · Claude · Claude Code · ChatGPT · Lovable · Salesforce (Flow Builder). **Familiar:** MuleSoft · Jira · Asana · Microsoft Visio. **Learning:** SQL

CERTIFICATIONS

Completed: Google Agile Essentials · AWS Cloud Practitioner Essentials · Okta Identity Foundations · Google Cloud Introduction to Responsible AI · PMI Generative AI Overview for Project Managers · Product Marketing: Go-to-Market Strategy & Launch · ISC2 Foundations of GRC · Claude 101 (Anthropic Academy)
